

3MTT WEEK 1 CLOUD COMPUTING ASSIGNMENT

1. PROS AND CONS OF CLOUD ADOPTION

	PROS	CONS
1.	Cloud adoption is cost effective at the long run	Cloud adoption results to issues in security & privacy
2.	It is reliable	Data can be breached
3.	It is scalable	It depends solely on the power of the internet
4.	It allows users to access a wide range of services	Users does not have absolute control of infrastructure and services provided
5.	It has high accessibility	
6.	It takes away the burden of owning and managing infrastructure, servers and building by the user	

2. FEATURES AND CAPABILITIES OF CLOUD INFRASTRUCTURE

- a. Cloud Computing provides a virtual method of computation and mimic the physically available computer machines.
- b. It is capable of providing on demand services same as the physical computer infrastructure
- c. Cloud infrastructure comes under the backend of cloud architecture which represents the hardware and software such as virtualization software (hypervisors), servers, storage management software

d. Hence, it provides services for private cloud, public cloud, hybrid cloud and community cloud respectively. Major Cloud service provider includes AWS, AZURE and GCP
