

QUESTION THREE: COST MANAGEMENT

FOLLOW UP NOTE

To optimize latency West Europe was chosen as the nearest region to my geographical location and to deploy a VM.

However, South Africa North is the closest Azure Data Centre region for deployment. since users could be global and want more services. A virtual machine was deployed with shared responsibility model of IAAS (Infrastructure As A Service) where the cloud service provider only provides infrastructure such as Physical Data Center, Physical Host and Physical Network while the user provides the software and other resources.
